

Sara Kim & Grace Kang

nand2tetris Project 11

Project 11 is an extension of project 10.
SymbolTable.cpp and SymbolTable.h were added.

To compile:

go into the Kim_Sara_Project11/ Kang_Grace_Project11 folder from the command prompt/terminal

Once in the folder type:

```
g++ *.cpp          press enter
./a.out FILE_NAME.jack  press enter
```

where FILE_NAME.jack is any Jack file that user wants to translate to .xml file.

It is important that the Jack file that needs to be translated is within the same folder (Kim_Sara_Project11 folder).
