

**Sara Kim**  
**nand2tetris Project 7**

**To compile:**

go into the Kim\_Sara\_Project7 folder from the command prompt/terminal

Once in the folder type:

```
g++ *.cpp          press enter
./a.out FILE_NAME.vm      press enter
```

where FILE\_NAME.vm is any vm file within the same folder (Kim\_Sara\_Project7 folder) that user wants to translate to .asm file.

The SimpleAdd.asm file included in the folder is what was translated from the SimpleAdd.vm file provided.
